

Project Outline

Tuesday, 19 April 2022 2:00 pm

Introduce

We will develop a forum app for gamers to share their gaming experiences, guides, reviews and make friends

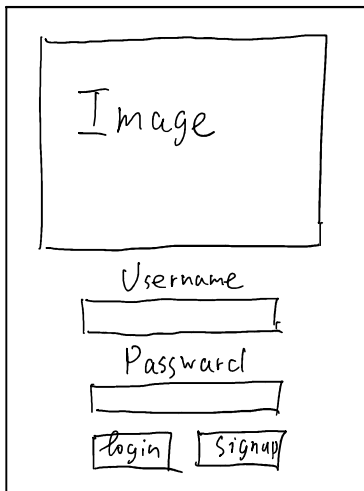

Each user can make posts, and each post has a tag indicating which game the post is related to and the category of the game.

When users want to browse the posts in the app, they can choose to only see posts that belong to a specific game. They can like and comment on posts.

Users can also follow post creators or be friend with them. After being friend with someone, they can have a private chat.

Each user can only delete their own posts. An administrator can delete any posts.
